

FEATURES

- All solid-state “crowbar” design with unlimited strike capacity
- Improved surge protection compared to GDT arrestors
- IEC 62368-1 certified

CommScope’s Fast Transfer Electronic Crowbar, model FTEC-230-R, is available as an alternative to the standard gas discharge tube surge arrestor for RF amplifiers.

The FTEC-230-R plugs directly onto the main printed circuit board of the BLE™, BT, and MB MPPS-II power supply.

Older MiniBridger™ amplifiers with the MPPS 60/90 power supplies are designed to use a 145 V surge arrestor, which is no longer available. The FTEC-230-R should not be used with these older power supplies.

CommScope recommends upgrading the power supply of these older MiniBridgers to the MPPS-II power supply, which is designed to use the FTEC-230-R Surge protector.

The FTEC-230-R and FTEC-145 are NOT interchangeable.

SPECIFICATIONS

Characteristics	Specification
Firing Voltage	230 V Nominal
ANSI/IEEE C62.41-1991 Surge Test, Volts	± 6000

ORDERING INFORMATION

Model Name	Part Number	Description
FTEC-230-R	522422-001-00	Electronic Crowbar Surge Protector, ROHS Compliant
